

ROYAL ORCHID SHERATON BRUNCH

Sunday brunch at Feast boasts a wide assortment of flavors and fares! Start off with a wide selection of salamis and cheeses or begin your binge with a healthy salad tossing in your favorite caesar ingredients for a fantastic fresh start! The brunch is perhaps most well known for their seafood spread which rivals any other in the city. Alaska crab legs, salmon, New Zealand mussels, fresh oysters, scallops and succulent lobster will tantalize your tastebuds and satiate your seafood cravings! Ethnic cuisines of vast varieties allow you to sample your favorites from every continent.

Cooking stations whip up made to order dishes of local flavors you'll want to try. Select your Australian Angus, ribeye, sirloin steak or pork chops and ask the chef to throw them on the grill and cook to your liking. A carving station with roast beef and ham will happily satiate the carnivores appetite! Chicken and sausage kebabs on skewers are laid out in vast quantity and variety. Indian curries, naan and dal and BBQ meats are among other vareties to choose from. International cuisine is also available and the made to order Italian pasta dishes guarantee a carb coma of the best kind! Freshly rolled sushi and customized pizzas ensure there is something for everyone! We are partial to the rib eye stew in puff pastry dish! A must try!

You've heard the saying "life is uncertain, eat dessert first" and we'd echo a resounding "amen!" While the dessert selection was not quite as extensive as the impressive brunch spread, there are some excellent treats to be found. The chocolate mousse cake for the chocoholic and the cold-stone creamery ice cream station with endless toppings was irresistible. The chocolate fountain of course tempts even the strongest self-willed sweet abstainer.

One other feature that sets Feast apart as a Sunday Buffet option for families, is their kids room featuring entertainment for your little ones. While a number of weekend brunch buffets in Bangkok claim to have a kids room, nothing we've seen compares to this!! The bounce house and staff in character costumes entertained our little ones with elaborate balloon artistry and face-painting. Our kids thought it was a carnival!!

A special meal spread catering to the young (and young at heart) is available specifically for the picky palate ensuring everyone leaves with full and satisfied bellies!....A kids lineup of all their favorite foods - hotdogs, chicken nuggets, mini hamburger sliders and French fries! The kids corner is within eyesight of parents who can linger over their meal while restless little ones run off some steam! If dining with friends or on a date, there are other brunches in the city that are more posh or upscale, but we'd argue you'd be hard to find more "bang for your buck" if you're brunch-ing with families or with children in tow!
